Report Description

This report lists current financial assurance mechanisms with a future expiration date in the user provided date range for all facilities that meet the additional selection criteria.

This report was created to help regulators, within a state or region, ensure that financial assurance mechanisms are current for a particular handler. For example, a RCRAInfo user can run this report using a "future expiration date range" starting today and ending in one year. The results will show which handlers have mechanisms that will expire within the next year. This allows regulators to prepare and plan for financial assurance renewal information that should be received in the upcoming year.
